

TVexpat : Windows 10 set up guide

Click on **START**

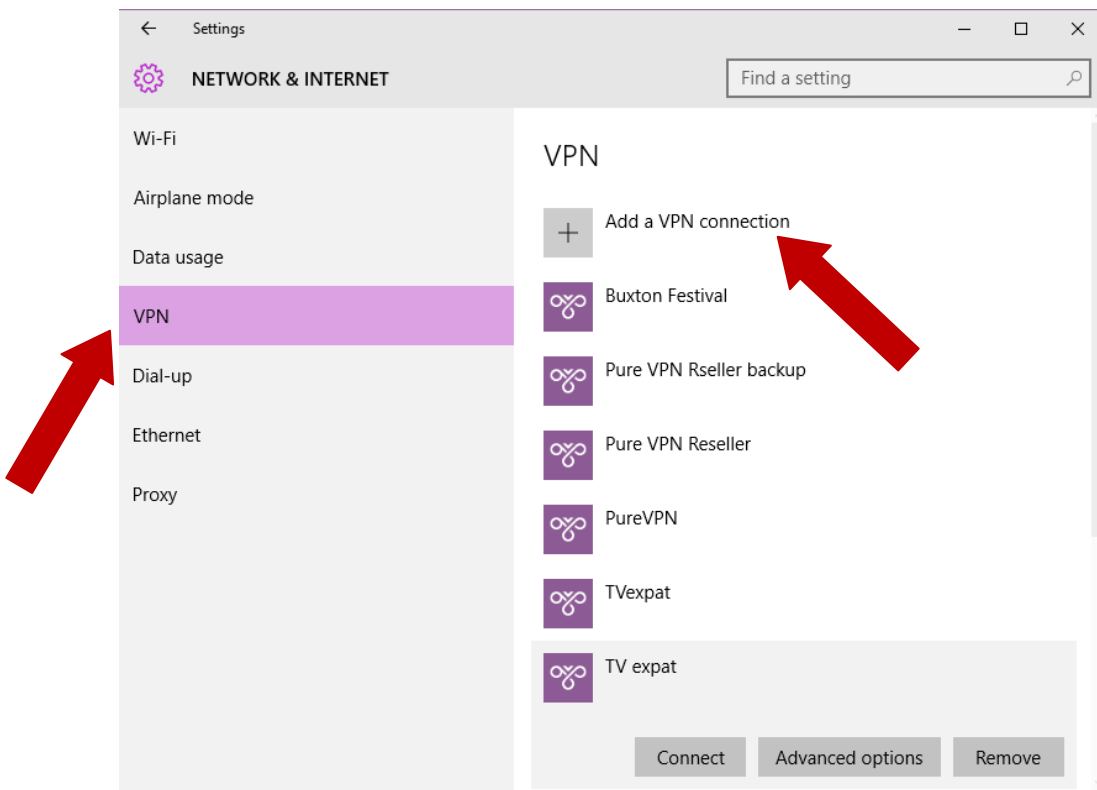

Click on **SETTINGS** then Select **Network & Internet**

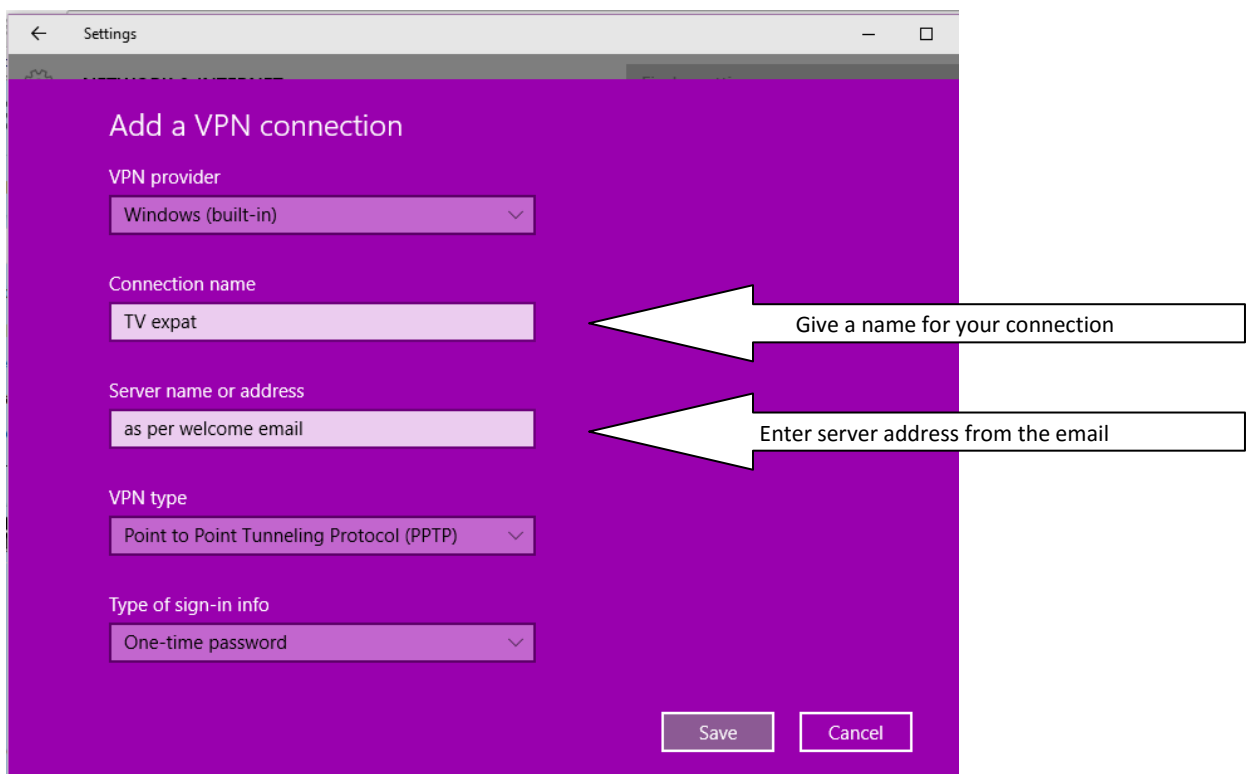

You will now automatically move to the next screen where you can begin setting up the VPN connection for TVexpat.

Click on **VPN** and then **ADD A VPN CONNECTION**

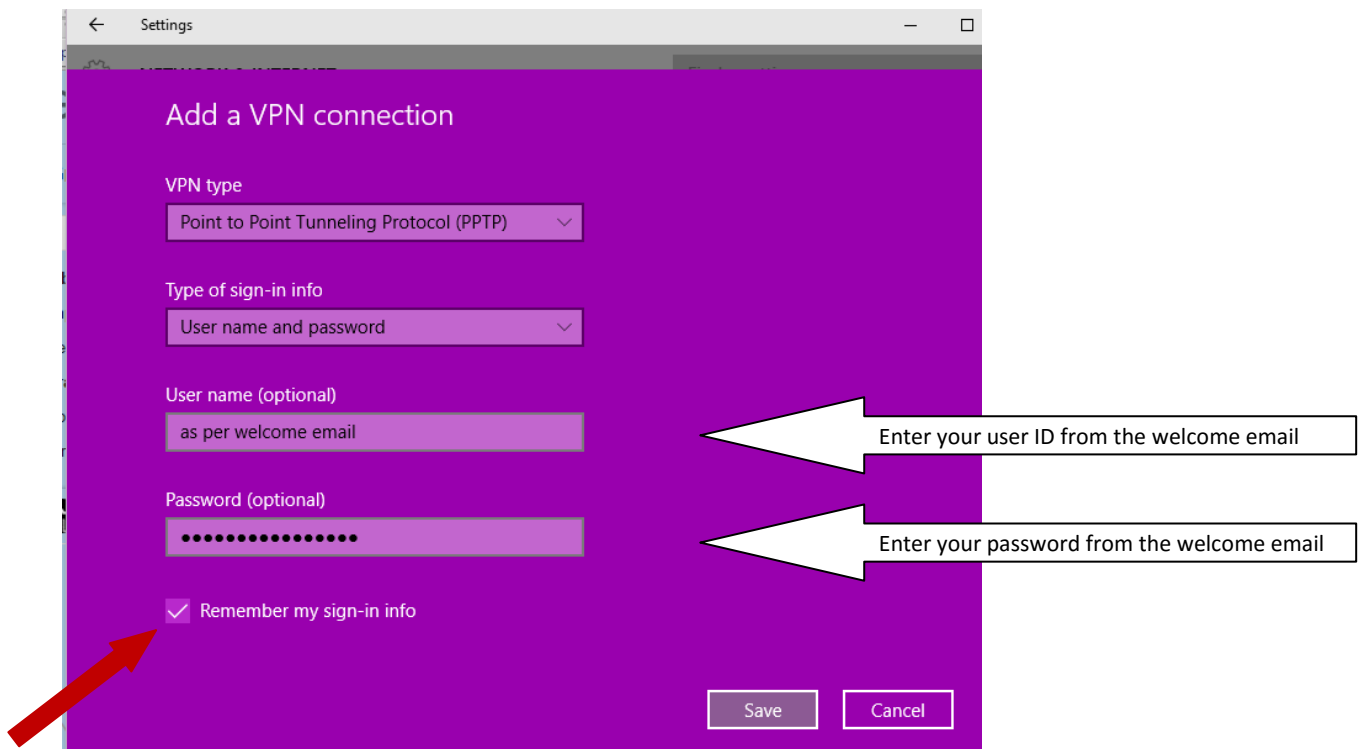

Now you will need to have the information to hand from your from your welcome email.

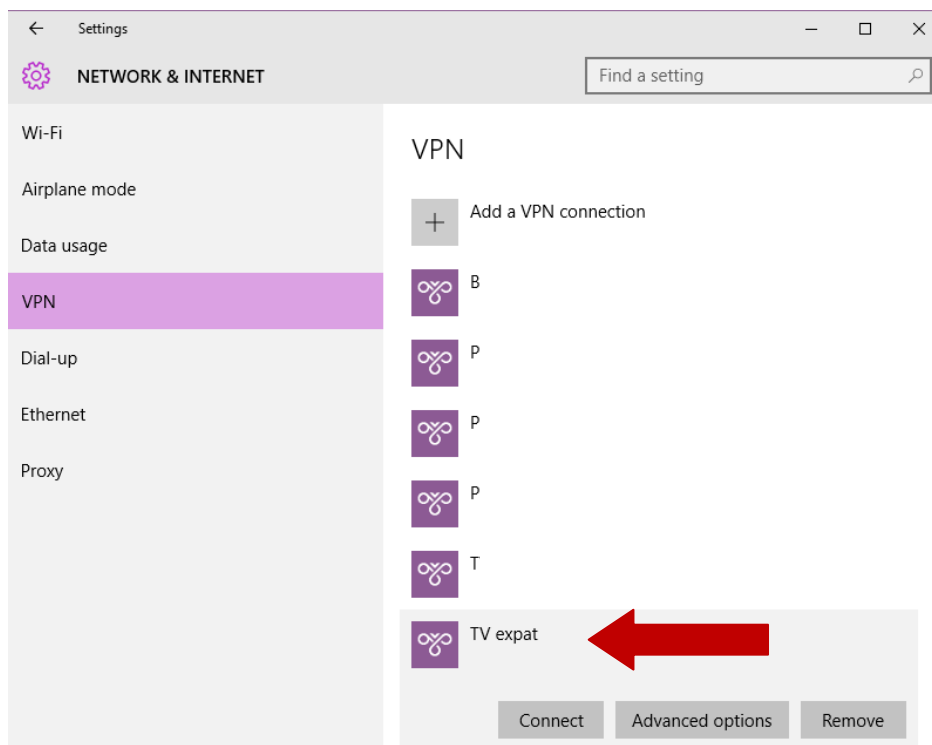

Make sure each box is as shown in the examples below.

Make sure each box is as shown in the examples below.

Click on **SAVE** and your new connection will now appear in your list of connections

Now click on Connect and start using your TVexpat connection. To check you have connected correctly, you can visit <http://whatismyipaddress.com/> and see on the map where you are now connected to the internet. If you have set up the connection correctly you will be showing on the map as being in the UK.
