

TVexpat: Windows 8 set up guide

Step 1: In Windows 8 you can use the 'Get Connected Wizard' to create a VPN profile. To launch the wizard, type **vpn** in **Settings**, and then click **Set up a virtual private network (VPN) connection**.

OR alternatively

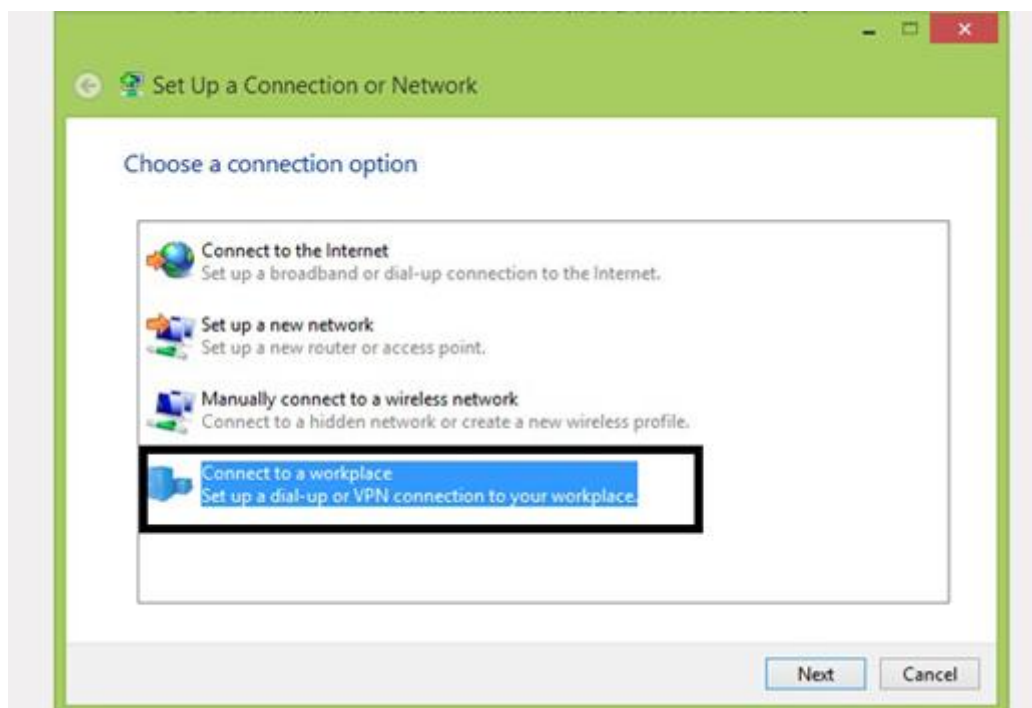

Right click on the computer icon on the system tray and go to "Open Network and Sharing Center "

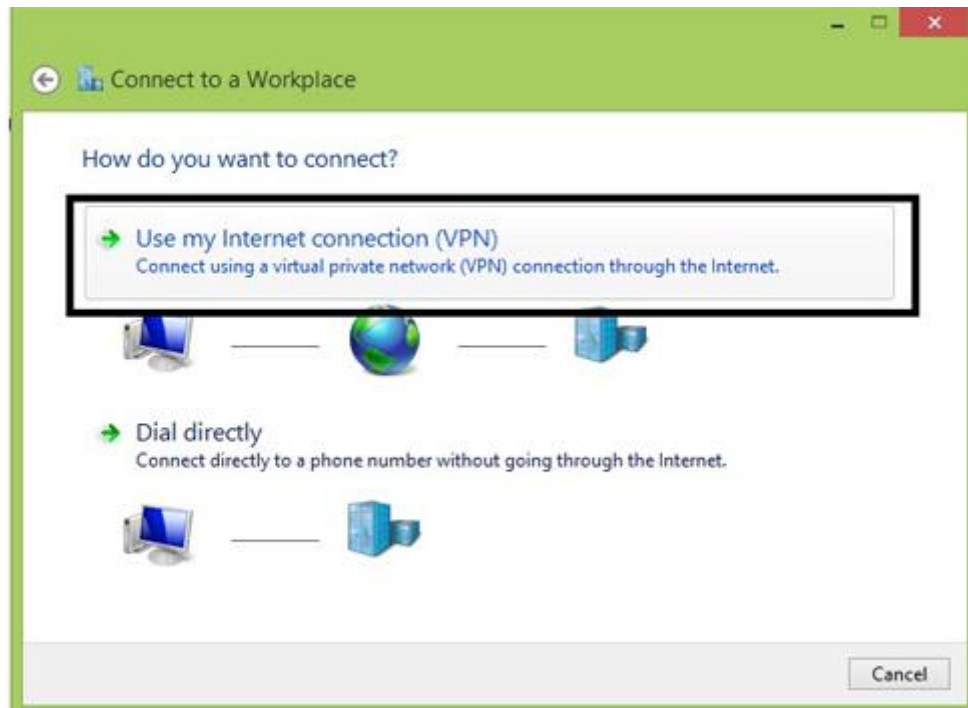

Step 2: Click "Set up a new connection or network"

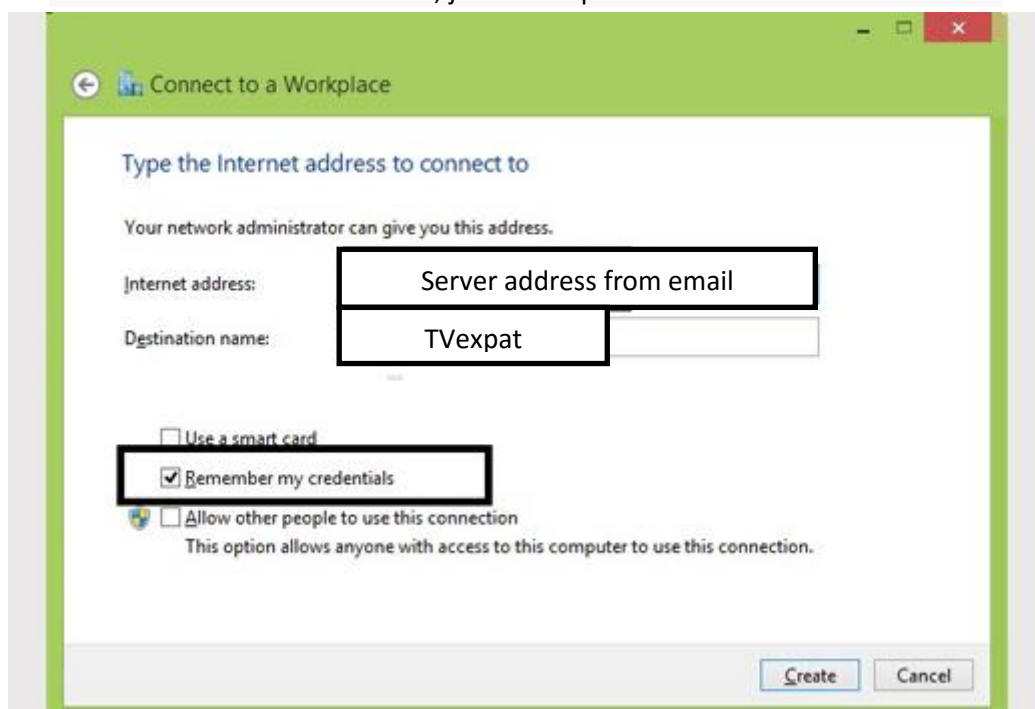

Step 3: Select "Connect to a workplace" and then click "Next"

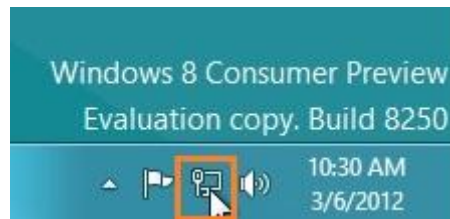

Step 4: Click "Use my Internet Connection (VPN)"

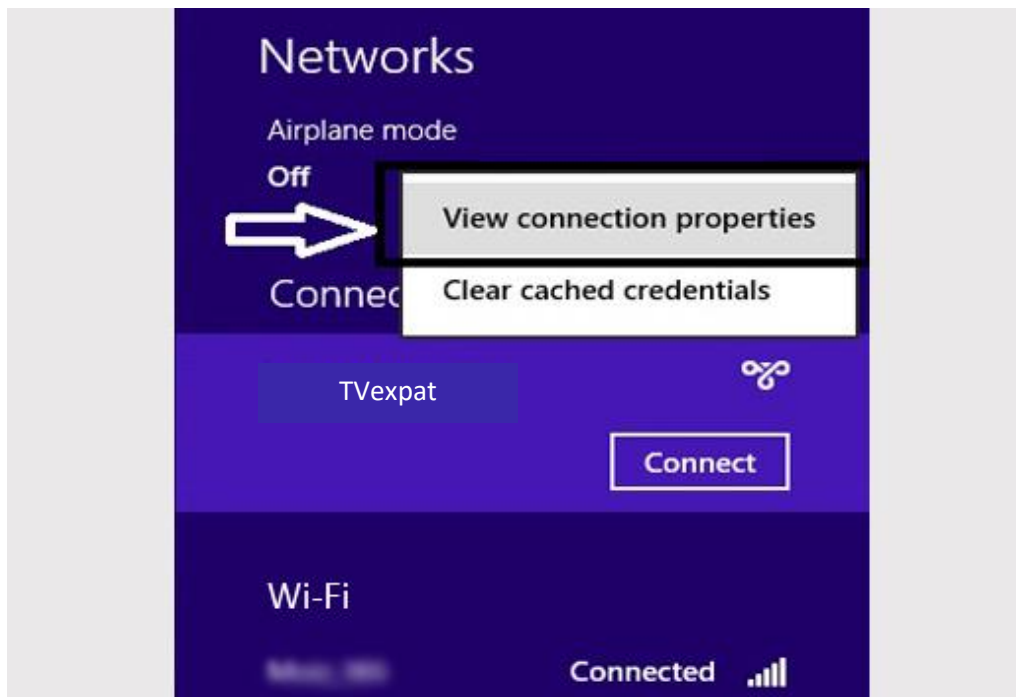

Step 5: Enter "server address" of your choice from the ones provided in configuration email (the same email that contains your user name and password). Destination name should be "TVexpat". Check mark "Don't connect now; just set it up so I can connect later". Hit "Next"

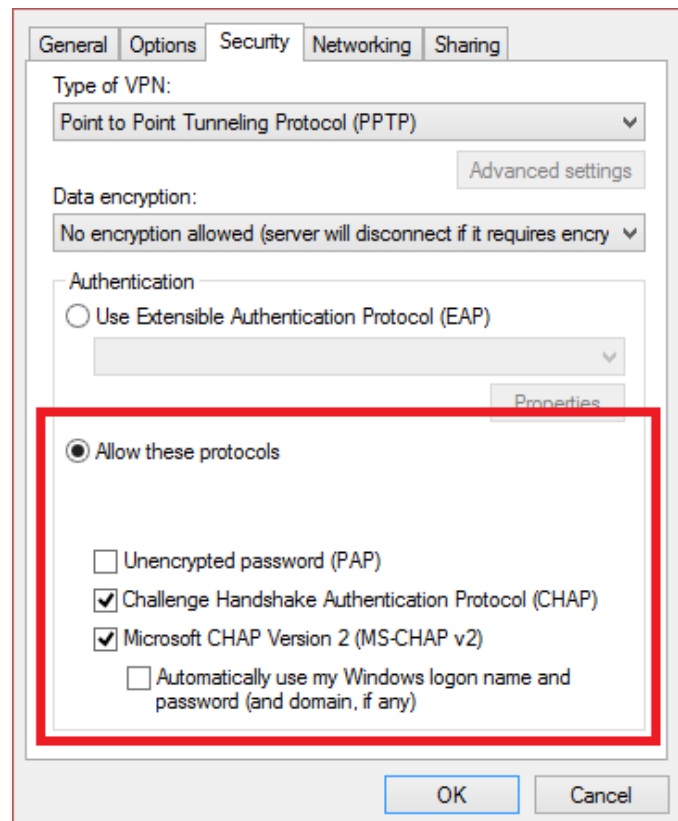

Step 6: Click on the monitor icon on the bottom right-hand corner.

Right click on the **TVexpat** connection and choose '*Properties*' from the menu

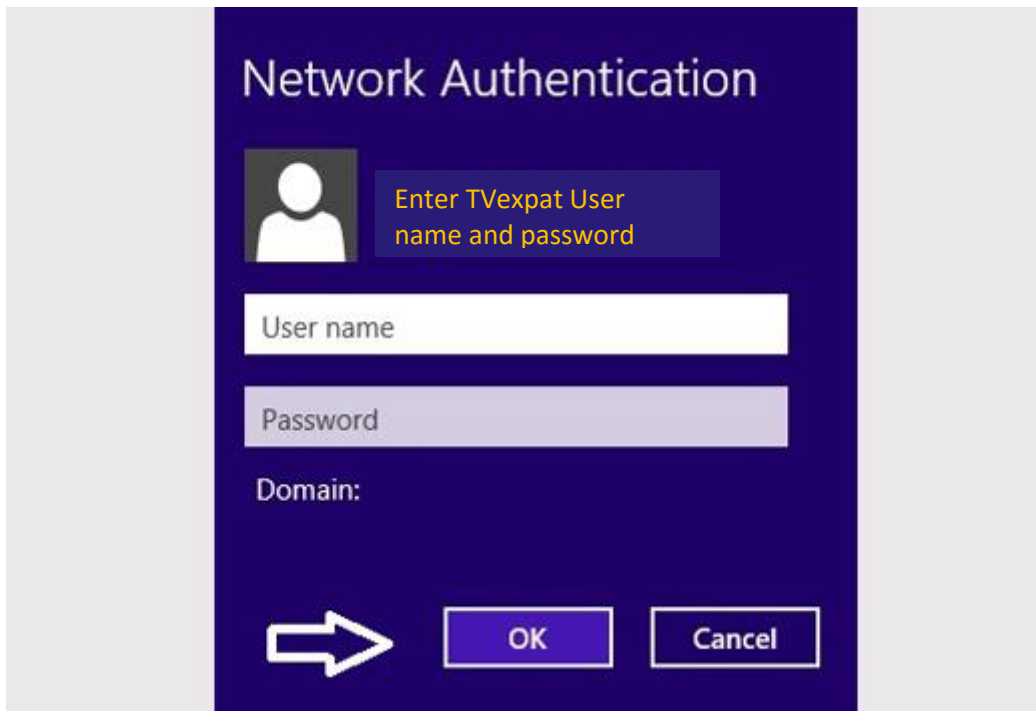

Step 7: Click on "Security" tab and select "Point to Point Tunneling Protocol" as shown and then press "OK"

Step 8: Now click on the computer icon in system tray and you will see the newly created VPN connection. click on "Connect"

STEP 9: Enter user name and password as provided in configuration email

STEP 10: You are now connected, Enjoy your **TVexpat**
